IDENTIFIERS	*Arkansas

ABSTRACT

Data on degrees conferred in 1982-1983 by the 31 higher education institutions in Arkansas are presented, along with a narrative description of trends. The data include second-summer, fall, spring, and first-summer terms. Degree production for 1982-1983 was 3.1% higher than 1981-1982. Most of the increase resulted from increases in associate degree production at state institutions. Forty-two percent of the certificate and associate degrees granted by Arkansas institutions were liberal/general studies degrees. Two fields of study dominate the baccalaureate area: the education and business fields each accounted for 24% of the baccalaureate degrees conferred by the 19 four-year Arkansas colleges and universities. Education was the dominant field at the masters degree level. Tables include an institutional listing of certificates and degrees conferred at the associate, bachelors, masters, and doctoral levels; degrees granted by level and discipline; degrees by level and sector; and degrees for the specific state and private institutions. The tables also provide a cross reference for the four groups of institutions (state four-year, state two-year, private four-year, and private two-year). Included are trend data on degrees for 1978-1979 through 1982-1983. (SW)

FOREWORD

This report is part of a series of analytical reports published annually by the Arkansas Department of Higher Education (ADHE) based on data collected through the Arkansas Higher Education Information System (AHEIS) and National Center for Education Statistics (NCES) surveys.

Beginning with the reporting period covered by the 1982-83 degrees granted report, data provided corresponds to the new Classification of Instructional Programs (CIP) coding system adopted by NCES. It should be noted that prior degrees granted and enrollment reports will not be directly comparable to data contained in this report. This information can be "crosswalked" between the HEGIS taxonomy and the CIP coding systems only on a program by program basis at each institution, and that process is susceptible to individual interpretation.

The efforts and the cooperation and assistance of the institutional personnel, too numerous to list here, who prepare these reports is greatly appreciated. Without those individuals the series of analytical reports would be impossible. We are particularly pleased at the high degree of participation by the independent institutions which makes the AHEIS one of the few statewide information systems to cover all institutions of higher education.

This report was prepared by Joanne Branscum with the assistance of Tom Spencer. The ADHE production division, supervised by Mary Griebel, provided a great deal of assistance in typing the various tables and reading the text for final publication.

EXECUTIVE SUMMARY

This report displays fall 1982 enrollment and 1982-83 degrees granted by major field of study for each of Arkansas' 31 colleges and universities.

Arkansas colleges and universities granted a record 11,692 degrees during 1982-83. Degrees were granted at eight levels including certificates, associate, baccalaureate, masters, specialist, intermediate, doctoral and first professional levels. Degree production for 1982-83 was 3.1% higher than 1981-82. Most of the increase can be traced to increases in associate degree production among the state institutions.

Forty-two percent of the certificate and associate degrees granted by Arkansas colleges and universities were liberal/general studies degrees. According to a recent report regarding transfer students in the state, a majority of the state two-year students, upon completing the liberal/general studies degree requirements, transfer to a four-year institution to pursue a baccalaureate degree. Associate degrees granted in liberal/general studies, health professions and business related fields accounted for 1,967 (86%) of the 2,284 certificate and associate degrees conferred in 1982-83.

Two fields of study dominate the baccalaureate area: the education and business fields each accounted for 24% of the 7,286 baccalaureate degrees conferred by the 19 four-year Arkansas colleges and universities. The most popular business degree in 1982-83 was business administration, with 515 degrees granted, followed closely by accounting, with 506 degrees granted. Elementary Education was the favorite education degree with 507 degrees granted by the state-supported institutions and 160 by the independent institutions.

Education was clearly the dominant field at the masters degree level. Of the masters degrees granted during 1982-83, 1,653 degrees (54%), were in education. Elementary education was the single most popular masters degree. Of the 1,653 masters in education degrees conferred, 242 were in elementary education.

Of the 11,692 degrees granted in Arkansas in 1982-83, 86% were granted by the 19 state-supported institutions. This is consistent with enrollment patterns in the state. Over 88% of all Arkansas college students during the fall of 1982 were enrolled in state-supported institutions.

Currently, enrollment in the field of education at the undergraduate level appears to be declining, while the health and engineering areas appear to be gaining enrollment. Due to the large proportion of graduate hours taken during the summer and the lack of data reflecting majors of summer enrollees, conclusive evidence regarding graduate study trends was unavailable.

DEGREES GRANTED AND PROGRAM PRODUCTION BY ARKANSAS INSTITUTIONS OF HIGHER EDUCATION, 1982-83

The Degrees Granted and Program Production report summarizes and analyzes the types and numbers of degrees granted as well as enrollment by area of study at each of the 31 higher education institutions in the state of Arkansas that award degrees on an annual basis.

Beginning with the 1982-83 academic year, data pertaining to program enrollment and degrees granted corresponds to the new Classification of Instructional Programs (CIP) coding system, as approved by the National Center for Education Statistics (NCES). Data released in prior years used the Higher Education General Information Survey (HEGIS) coding system. Thus, prior year reports will not be directly comparable to this year's data and should be used for reference rather than comparison purposes.

The data presented in this report were collected through the Arkansas Higher Education Information System (AHEIS) and NCES surveys. All degrees granted reports were compiled on a July 1 to June 30 fiscal year basis, and thus include data for the second summer, fall, spring and first summer terms for the 1982-83 academic year. The enrollment data presented reflects enrollment by major area of study for fall 1982.

In addition to the statistics presented throughout the report narrative, a great deal of data is provided in the appendices. A comprehensive listing of degrees granted by all Arkansas higher education institutions is included as Appendix A, with data broken out by type of degree and corresponding to the CIP coding system. Appendix B is a compilation of all postsecondary degrees granted in Arkansas during the 1982-83 academic year. The tables provide a cross reference for the four groups of schools (i.e. state-supported two-year and four-year, and independent two-year and four-year). Appendix C presents a listing of fall 1982 enrollment figures, by major field of study, for certificate, associate, upper division undergraduate and graduate programs at all 31 schools.

For the reader's convenience, a glossary of the primary terms used in this report is included as Appendix D. Finally, Appendix E provides a list of the names and corresponding abbreviations for the 31 higher education institutions in Arkansas.

FIVE YEAR TRENDS: TYPES OF DEGREES GRANTED

Total degree production in Arkansas increased steadily, 11.6%, over the five year period 1978-79 to 1982-83 (see Table 1). While total degree production at the two-year and four-year state-supported institutions increased annually for the period, the figures for the independent institutions showed both minor increases and decreases from year to year.

Certificates/Associate Degrees

The number of certificate and associate degrees awarded increased both numerically and in proportion to total degrees granted from 1981-82 to 1982-83. A decline of 34 associate degrees awarded by the independent institutions was offset by an increase of 39 certificates and 460 associate degrees granted by the state-supported institutions resulting in a net gain of 18.5% at the certificate level and 26.3% at the associate level. However, during 1982-83, WCC awarded 245 associate degrees to former students who, upon leaving WCC, lacked only application for graduation or a limited number of hours. Consequently, an increase of 215 associate degrees, (12.1%) would be a more accurate description of the increase in degrees granted.

Baccalaureate Degrees

During 1982-83, 7,286 baccalaureate degrees were conferred by Arkansas colleges and universities. Over 60% of all degrees conferred were at the bachelors level. While state-supported degree production at the bachelors level increased annually from 1978-79 through 1982-83, slight fluctuations occurred in the independent institutions' production. The decline in bachelors degree production at the independent institutions can be attributed to the decline in

TABLE 1. DEGREES GRANTED AND OTHER FORMAL AWARDS CONFERRED BY ARKANSAS INSTITUTIONS, 1978-79 THROUGH 1982-83

	1978-79	1979-80	1980-81	1981-82	1982-83

Bachelors	1,376	1,459	1,408	1,469	1,378
Masters	60	67	71	100	111
Subtotal	1,610	1,686	1,658	1,766	1,652
ALL INSTITUTIONS					
Certificate	257	275	222	178	217
Associate	1,529	1,668	1,593	1,641	2,067
Bachelors	6,666	6,959	6,961	7,315	7,286
Masters	1,541	1,607	1,680	1,634	1,563
Specialist	30	46	59	54	54
Intermediate	16	14	14	15	14
Doctoral	93	108	105	126	128
First Professional	342	345	391	382	363
TOTAL DEGREES GRANTED	10,474	11,022	11,025	11,345	11,692

enrollment during 1979-80. The increased production of bachelors degrees at the state-supported institutions was not significant enough to offset the loss among the independent institutions. Consequently, 1982-83 baccalaureate degree production declined by 4.3% from the previous year.

Graduate Degrees

The number of degrees being granted at the specialist, intermediate, doctoral and first-professional levels have remained stable during the last three years. (See Figure 1). Masters degree production declined in both 1981-82 and 1982-83 and is currently near the number conferred during 1978-79. While masters degree production at the state-supported institutions has been declining, the production at independent four-year institutions has been increasing. The number of masters degrees being granted by the independent institutions has increased steadily during the past five years, going from 60 degrees in 1978-79 to a record production of 111 degrees in 1982-83. Of the 60 degrees granted in 1978-79, 16 were conferred by Harding University (HU) and 44 by Ouachita Baptist University (OBU). In 1982-83, 22 of the 111 degrees conferred were granted by HU and 89 by OBU.

1982-83 DEGREES GRANTED BY SUBJECT FIELD

Table 2 displays degrees granted at Arkansas colleges and universities by type of degree and by subject field for 1982-83. The change from the HEGIS coding system to the CIP coding system prevents trend analysis by subject field.

Of the 2,284 certificate and associate degrees awarded, 42% were liberal/general studies degrees, 28% were in the health professions field and 16% were awarded in business related fields. These areas account for 1,967 (86%) of the certificate and associate degrees conferred in 1982-83. Certificate and associate degrees were also granted in 15 other subject areas.

Two fields of study dominated the baccalaureate area, those being the education and business fields which each granted 24% of the baccalaureate degrees conferred. The 19 four-year Arkansas colleges and universities offered a total of 85 business degree programs and 275 education degree programs in 1982-83. The most popular business degree in 1982-83 was business administration, with 515 degrees granted, followed closely by accounting, with 506 degrees. Elementary Education was the favorite education degree with 507 degrees being granted by the state-supported institutions and 160 by the independent institutions. Appendix B contains detailed data on degrees granted in individual programs.

FIGURE 1. TYPE OF DEGREES GRANTED AS A PROPORTION OF TOTAL DEGREES GRANTED BY ARKANSAS INSTITUTIONS, 1978-79 THROUGH 1982-83

*Other Graduate Degrees includes Specialist, Intermediate, Doctoral and First Professional degrees.

Education was clearly the dominant field at the masters degree level. Fifty-four percent of the masters degrees granted during 1982-83 were in education. Elementary Education was the single most popular masters degree. A total of 1,563 masters degrees were granted in 1982-83. Of that number, 242 were in elementary education.

Other types of graduate degrees granted include specialist, 54 degrees; intermediate, 14 degrees; doctoral, 128 degrees; and first professional, 363 degrees. The specialist degrees granted were all in the education field and were granted by two institutions, Arkansas State University-Jonesboro (ASUJ) and the University of Arkansas at Fayetteville (UAF). The 14 intermediate degrees were dietetic internship certificates conferred by the University of Arkansas for Medical Sciences (UAMS). Of the 128 doctoral degrees granted, 119 were conferred by UAF and 9 by UAMS. Three first-professional degree programs are offered in the state of Arkansas: law at UAF and the University of Arkansas at Little Rock (UALR), and medicine at UAMS.

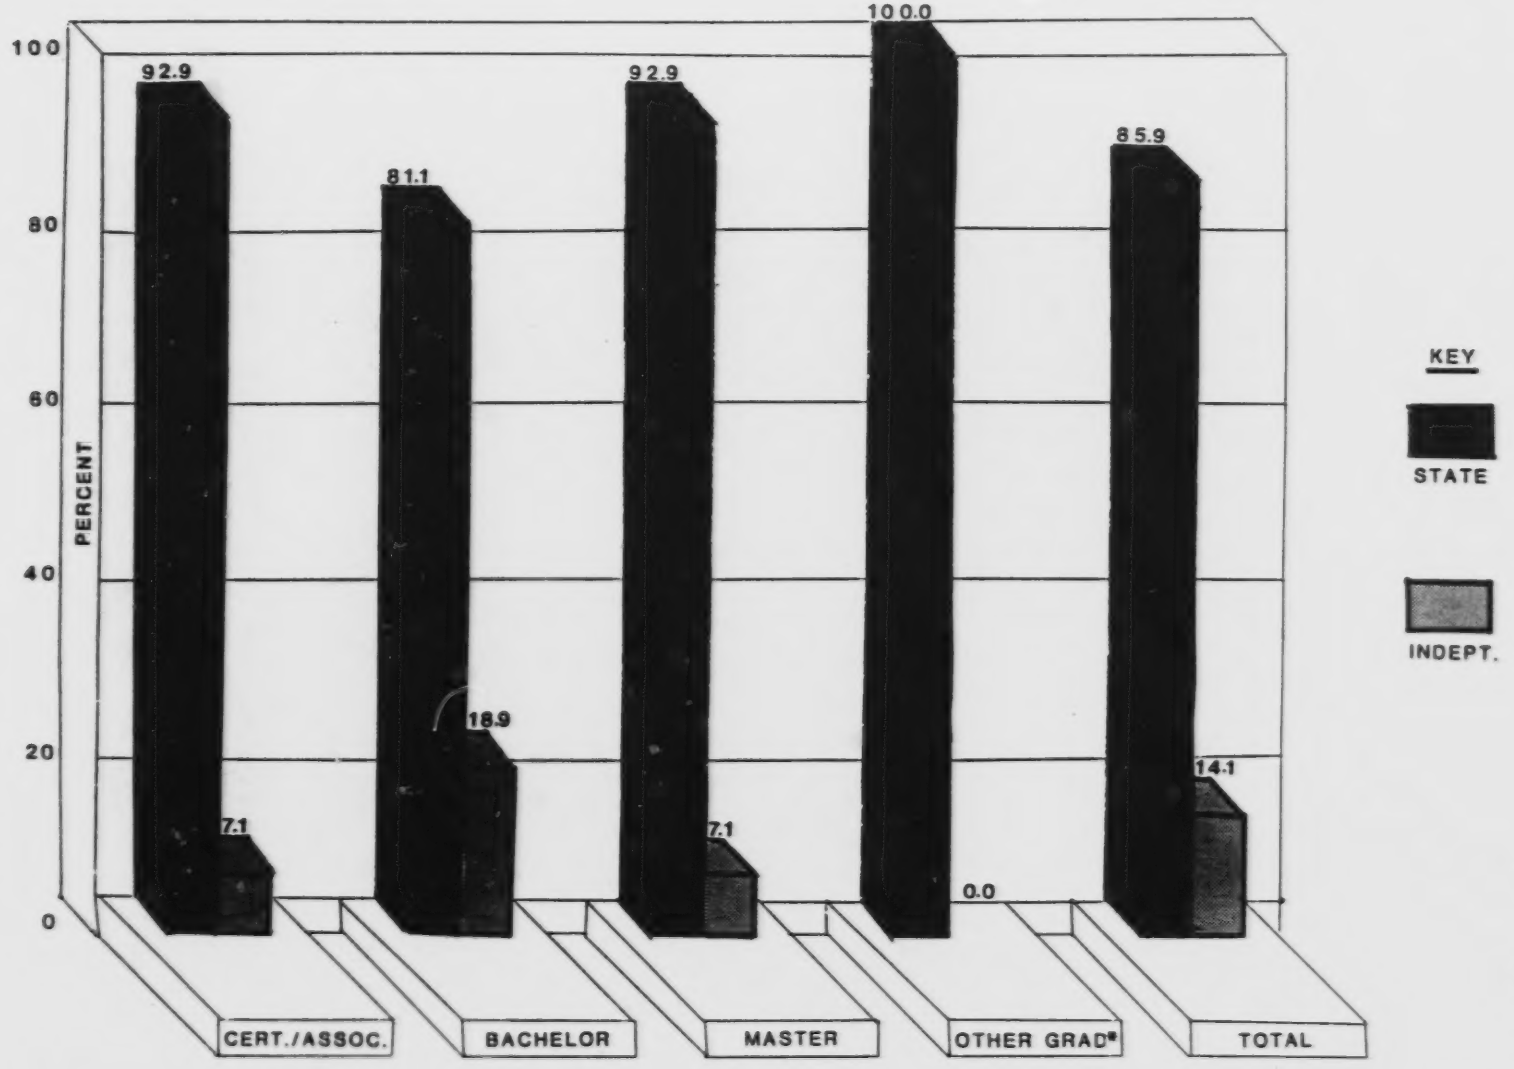
FIVE YEAR DEGREES GRANTED TRENDS BY TYPE OF INSTITUTION

Eighty-six percent of the 11,692 degrees granted in Arkansas in 1982-83 were granted by the 19 state-supported institutions. This is consistent with enrollment patterns in the state. Over 88% of all Arkansas college students in 1982 were enrolled in state-supported institutions. Figure 2 displays 1982-83 degrees granted by type of degree and percentage awarded by state and independent institutions in Arkansas.

The proportion of degrees granted by state institutions has grown as enrollment at the state schools has increased. Conversely, declines in degree production among the independent institutions can be attributed to declining enrollments. The proportion of degrees granted by state-supported institutions has increased from 84.6% in 1978-79 to 85.9% in 1982-83.

Of the 2,284 certificate and associate degrees granted in 1982-83, 2,121 (92.9%) were awarded by state-supported schools and the remaining 163 (7.1%) by

FIGURE 2. DEGREES GRANTED BY TYPE OF DEGREE AND PERCENTAGE AWARDED BY STATE AND INDEPENDENT INSTITUTIONS IN ARKANSAS, 1982-83



*Specialist, Intermediate, Doctoral and First Professional

the independent institutions. A total of 1,378 bachelors degrees (18.9%) was awarded by the independent schools, while 5,908 (81.1%) were earned at state-supported institutions. At the masters level, 92.9% (1,452) were awarded by the state-supported schools and 7.1% (111) by the independent institutions. As mentioned earlier, all other graduate degrees (i.e. specialist, intermediate, doctoral, and first professional) are awarded only by a limited number of state-supported schools. In 1982-83, a total of 559 other graduate degrees were earned, including 54 specialist, 14 intermediate, 128 doctoral and 363 first professional.

State Two-Year Institutions

The nine state-supported two-year institutions offered a total of 69 certificate and 197 associate technical/occupational programs in 1982-83. Certificates awarded by state two-year institutions increased by 45 degrees (19.4%) from 1981-82. The number of certificates conferred from 1978-79 through 1982-83 has fluctuated from a low of 137 in 1978-79, to a high of 201 in 1979-80, to the present 182. (See Table 3). At least 89% of the certificates granted during the past four years were conferred by two institutions, Phillips County Community College (PCCC) and Westark Community College (WCC). While the number conferred by PCCC has remained stable, ranging from 75 to 83 degrees, WCC has experienced major fluctuations. WCC granted 103 certificates in 1979-80, 49 in 1981-82 and 74 in 1982-83. Most of the fluctuation in certificates awarded at the state two-year institutions can be traced to WCC. In 1978-79, WCC granted 38 certificates in the health services and paramedical technology area as compared to 18 in 1982-83. WCC granted 22 certificates in the mechanical and engineering technologies area in 1978-79 as compared to 50 in 1982-83.

During 1982-83, 2,067 associate degrees were awarded. Seventy percent were awarded at the state two-year colleges. Table 4 displays the number of associate degrees awarded by institutions for 1978-79 through 1982-83. Similar to the pattern set with certificates awarded, the pattern of associate degrees awarded at the two-year state institutions paralleled associate degree awards at WCC. The change in associate degree awards at WCC can be traced to a change

in general education degrees granted. Table 5 displays the number of general education associate degrees granted by state two-year institutions from 1978-79 through 1982-83. A majority of students completing the associate degree requirements for the general education program apply those credits toward a four-year degree. Further, many students transfer without applying for graduation. During 1982-83, WCC awarded 245 associate degrees to students who had previously transferred, lacking only applications for graduation or limited numbers of hours.

State Four-Year Institutions

A total of 8,404 certificates and degrees were granted by the 10 state-supported four-year institutions located in Arkansas. The state four-year institutions offered degree programs at eight levels, including certificate, associate, baccalaureate, masters, intermediate, specialist, doctoral and first professional.

Only two institutions granted certificates during the past five years, ASUJ in secretarial technologies and UAMS in various health service and paramedical technologies. The number of certificates conferred has declined significantly during the past five years, falling from 107 in 1978-79 to 27 in 1982-83. While certificate production at ASUJ has remained stable, the UAMS figures have

plummeted from 102 in 1978-79 to 18 in 1982-83. In 1978-79 UAMS granted certificates in dental hygiene (29), radiologic technology (13), surgical technology (10), nurse practitioner (13), and medical technology (37). In 1982-83 seven dental hygiene and 11 surgical technology certificates were granted.

State four-year institutions granted a total of 458 associate degrees during 1982-83. Associate degree production at these institutions has remained relatively stable during the past five years. Of the associate degrees awarded in 1982-83, 60% were nursing degrees.

There were 5,908 baccalaureate degrees awarded at the state four-year institutions during 1982-83 representing 81% of the bachelors degrees awarded in the state. Table 6 displays the number of bachelors degrees granted by institution for 1978-79 through 1982-83. Four state institutions granted a total of 181 fewer degrees, and six granted a total of 243 more baccalaureate degrees this year than last, for a net gain of 62 degrees. ASUJ experienced the largest decline, 97 fewer degrees, and UAF experienced the largest increase, 75. Both the increase and decrease can be directly related to changes in enrollment at the institutions in 1979-80.

Masters degrees are offered at all state universities except the University of Arkansas at Monticello (UAM) and the University of Arkansas at Pine Bluff (UAPB). Of the 1,452 masters degrees conferred by these institutions during 1982-83, 50% were in the field of education and 13% were in business. UAF granted 48% of the masters degrees conferred, followed by ASUJ, 15%, UCA, 13%, and UALR, 10%.

Table 7 displays masters degrees by institution for 1978-79 through 1982-83. Eighty-two fewer masters degrees were granted this year than last. Declines occurred in education, (-124), and nine other masters areas, (-62) degrees; however, increases occurred in business, (+29), health, (+29), and nine other other areas, (+46).

Other graduate degrees granted include specialist, 54, intermediate, 14, doctoral, 128 and first professional, 363. Production in these areas has remained relatively stable. Tables 8, 9 and 10 display production in each of these areas for 1978-79 through 1982-83.

UALR-LAW	54	81	97	102	97
UAMS-MEDICINE	127	121	136	133	130
TOTAL	342	345	391	382	363

All specialist degrees are granted in education and are generally geared toward educational administration; for example, educational administration elementary principalship, and educational administration secondary principalship. Two institutions granted specialist degrees in 1982-83: ASUJ, 20; and UAF, 34. UAMS granted 14 intermediate (dietetic internship) degrees.

Of the 128 doctoral degrees granted, UAF granted 119 and UAMS granted 9. UAF currently offers 21 different doctoral programs with areas including agricultural science, business, education, engineering, letters (English), life sciences, mathematics, philosophy, physical sciences, psychology and social science. UAMS offers 6 different doctoral programs in the life sciences area.

Degrees were granted in three first-professional programs: Law at UAF and UALR and medicine at UAMS. UAMS also offers a doctoral degree program in pharmacy. However, no degrees were awarded in that program during 1982-83.

Independent Two-Year Institutions

Crowley's Ridge College (CRC), Shorter College (SC) and Southern Baptist College (SBC), the three two-year independent institutions in the state granted a total of 7 certificates and 109 associate degrees. SC was the only independent institution granting significantly fewer associate degrees this year. SC granted 17 associate degrees in 1982-83 as compared to 51 in 1981-82. This decline may be attributed to a decline in enrollment in 1982.

Ninety-five percent of the associate degrees granted by these three institutions during 1982-83 were general education arts and sciences degrees.

Independent Four-Year Institutions

In 1982-83, 1,536 degrees in total were granted by the independent four-year institutions in four degree types including certificate, associate, baccalaureate and masters degrees. Of that number, 3% were certificate/associate degrees, 90% were bachelors degrees and 7% were masters degrees.

Arkansas College, (AC) granted the only certificate conferred by an independent four-year institution. Four institutions, Central Baptist College (CBC), College of the Ozarks (CO), Harding University, (HU), and John Brown University (JBU) granted associate degrees. Of the 46 associate degrees conferred, 20, 43%, were in business related programs and 19, 41%, were general education arts and sciences degrees.

Four-year independent institutions granted 1,378 baccalaureate degrees in 1982-83. Of that number, 521, 38%, were granted by Harding University. Six of the nine institutions granted fewer baccalaureate degrees this year than last. Most of the decline can be traced to a decline in enrollment at these institutions during 1979.

Twenty-five percent of the bachelors degrees granted were education degrees and 23% were business degrees. Of the 316 business degrees granted, 172 were in business administration. Of the 346 education degrees granted, 160 were elementary education degrees.

Two institutions, Harding University (HU) and Ouachita Baptist University (OBU) granted masters degrees in 1982-83. Eighty-six (77.5%) of the masters degrees granted were Elementary Education degrees. All but one of the 111 masters degrees granted were in the field of education.

FALL 1982 ENROLLMENT BY MAJOR FIELD OF STUDY

Upper Division Undergraduate

Upper division undergraduate enrollment by major field of study for state-supported, independent and all higher education institutions in Arkansas is provided in Table 11. An interesting comparison can be made between Table 11 and Table 2 which displays the number and percentage of bachelors degrees granted by subject field for 1982-83. The proportion of students majoring in the field of education appears to be declining while the proportion majoring in engineering and health sciences appears to be increasing. It should be noted that 5.97% of the enrollees were classified as undecided regarding major field of study.

Both the state-supported and independent institutions offered baccalaureate programs in most academic areas. Only the state-supported schools reported upper division enrollment in agriculture, protective services and precision production and only the independents had students in theology.

Graduate

Graduate enrollment by major field of study by type of institution and for all higher education institutions in Arkansas is provided in Table 12. In 1982-83, 43.8% of all graduate degrees granted including masters, specialist, doctoral and first-professional were in the field of education. According to Table 12, only 22.6% of the fall 1982 graduate students have declared a major in the field of education. However, two contributing factors may have caused this area to be significantly under-represented. According to the Annual Enrollent, Auditing, Nonstandard Instruction and Credit-Awarding Activities in

APPENDIX D

APPENDIX D: GLOSSARY

STUDENT LEVEL - Refers to the proportion of total requirements a student has obtained, as of the census date, toward the completion of the degree/diploma or certificate program in which the student is enrolled. The following mutually exclusive student level categories will be used:

UNDERGRADUATE:

1. LOWER DIVISION - A student who a) is enrolled in a program(s) of study, or activity(ies) which leads to an associate degree (including three-year associate degree programs) or a bachelors degree and has earned less than 60 semester credit hours; or b) is enrolled in an undergraduate occupational or vocational program(s) of three or fewer years' duration which results in formal recognition below the baccalaureate degree. (Typically, this individual would be classified as a freshman or a sophomore.) The following subdivisions may also be used:

   a. FRESHMAN - A lower division student who has earned fewer than 30 semester credit hours.

   b. SOPHOMORE - A lower division student who has earned at least 30 but less than 60 semester credit hours. (In institutions offering two-year or less programs, students who have earned 30 or more semester credit hours are classified as sophomores.)

2. UPPER DIVISION - A student who a) is not in an associate degree or occupational/vocational program(s), b) is enrolled in a bachelors degree program, and c) has earned 60 semester credit hours. (Typically, this individual is classified as a junior or a senior.) This category includes a student in years three, four, or five of a five-year bachelors degree program. The following subdivisions may also be used:

   a. JUNIOR - A student who has earned at least 60 but less than 90 semester credit hours.

   b. SENIOR - A student who has earned 90 or more semester credit hours.

3. UNCLASSIFIED PRE-BACCALAUREATE - A student who cannot be classified into one of the categories above because he or she is not enrolled in a program of study leading to a degree/diploma or certificate, even though taking courses with regular students. This category does <u>not</u> include students who have been admitted to pursue a degree but have not yet declared a major. This category <u>does</u> include students who have received an earned <u>baccalaureate</u> degree, have <u>not</u> been accepted by the institution for graduate-level study, <u>and</u> are taking undergraduate-level courses, such as teachers taking courses for certification.

FIRST PROFESSIONAL - A student who is enrolled in a first professional degree program. (See DEGREE/DIPLOMA/CERTIFICATE for an inclusive list of FIRST PROFESSIONAL DEGREE PROGRAMS.) A student enrolled in an undergraduate pre-professional curriculum or a student in one of the first two years corresponding to the undergraduate freshman or sophomore year of an integrated graduate professional degree program(s) should be classified as a lower division and not as a first professional student.

GRADUATE:

1. MASTERS - A student who has received an earned baccalaureate degree, has been accepted for graduate-level study, and:

   a. Who is enrolled in a masters degree program, or

   b. Who is enrolled in a doctoral program but has earned less than 30 semester credit hours in graduate course work.

2. SPECIALIST - A student who has received an earned baccalaureate degree and is enrolled in a specialist degree program.

3. DOCTORAL - A student who has received a masters or specialist degree, or has earned at least 30 semester credit hours in graduate course work, and who is enrolled in a doctoral degree program.

4. UNCLASSIFIED POST-BACCALAUREATE - A student who has been awarded an earned baccalaureate degree and who is eligible to enroll in credit courses at the graduate or other post-baccalaureate level but who cannot be classified into one of the categories above because he or she has not been accepted by the institution for graduate-level study.

TYPES OF DEGREES - Eight major types of earned degrees are awarded annually by Arkansas colleges and universities. For the purposes of this report, the following mutually exclusive degree categories are considered:

1. POSTSECONDARY CERTIFICATE OR DIPLOMA - The majority of certificate are awarded by the two-year state-supported and independent schools. Typically designed for completion in less than two academic years, most certificate programs are offered in specialized areas including business and commerce, data processing, health or public services, and mechanical or natural science technologies.

2. ASSOCIATE DEGREE - An associate degree is granted following completion of an academic program of at least two years but less than the four years required by traditional baccalaureate programs. These degrees may be either terminal or preparatory for further postsecondary study.

3. BACCALAUREATE DEGREE - Baccalaureate degrees are earned after completion of a specified academic program of a minimum of four years.

4. MASTERS DEGREE - In liberal arts and sciences, masters degrees are customarily awarded upon completion of one to two years of academic work at the post-baccalaureate level. In professional fields such as law and medicine, the master's degree is an advanced degree usually earned after completion of a first professional degree.

5. SPECIALIST DEGREE OR CERTIFICATE - Specialist degrees, commonly in the field of education, are a type of intermediate degree earned between completion of the masters and doctoral degree.

6. INTERMEDIATE DEGREE - Other intermediate degrees are awarded as recognition for a program intermediate between masters and doctoral degrees. In essence, the intermediate degree is a doctoral degree without a dissertation.

7. DOCTORAL DEGREE - Reported independently of first professional degrees, doctorals are regarded as the terminal degree in a profession or academic discipline. An average of three years of graduate work and publication of a formal dissertation are common requirements for this type of degree.

8. FIRST PROFESSIONAL DEGREE - These degrees require a minimum of six years of postsecondary academic study, including two years of college work completed prior to admission to the program. First professional degrees are awarded in three fields in the State of Arkansas (i.e. law, medicine and pharmacy) and must be completed before establishing a practice in these professions. It should be noted that the University of Arkansas Medical Sciences Campus (UAMS) also offers both a bachelors program in pharmacy and a D.Phar. that qualify graduates for licensure, but only the D.Phar. is considered a first professional degree.
